

## Cancer CAG Strategy 2017- 2019

### OUR VISION

To unite cancer research into a globally-leading partnership to deliver continuing evidence-based practice in diagnosis, intervention and support.

### OUR STRATEGY IS BASED ON OUR FOUR PRIORITIES WITH DEFINED OBJECTIVES

Deliver research with impact to enable the best health outcomes

- Lead a strategic partnership to integrate and grow world-class cancer research
- Resource research excellence
- Grow a sustainably funded program of research

Partner effectively with the professional and general community and key stakeholders

- Utilise partnerships to drive implementation of research evidence into clinical practice
- Communicate research outcomes to the professional and general community
- Actively contribute to wider research networks

Develop areas of emerging research excellence aligned to health challenges of our society

- Drive innovation and change that brings value to those impacted by cancer
- Embed a culture of research excellence grounded in clinical and/or community health need
- Utilise developed partnerships to contribute to the national and international agenda

Create a culture of excellence to attract and retain talented professionals and students

- Utilise developed partnerships to contribute to quality undergraduate and postgraduate health & medical education
- Support clinicians to become research active

### OUR RESEARCH EFFORTS WILL BE DELIVERED THROUGH FOUR AREAS OF FOCUS

Living better with and after cancer

Bringing 'omics' into clinical practice

Improving poor outcomes cancers

Reducing unwarranted variation in clinical practice

### ACHIEVING THE FOLLOWING OUTCOMES

Agile multi-disciplinary and multi-institutional teams are formed to identify and answer relevant clinical questions

Research evidence is integrated into education, policy and practice

Visibility of research expertise, outcomes and benefits is enhanced

Enabling infrastructure, and the research workforce are strategically developed and integrated

Ongoing innovation to deliver transformative research grounded in community need and equity

OUR ACHIEVEMENTS WILL BE TRACKED VIA AN IMPLEMENTATION, MONITORING, AND EVALUATION FRAMEWORK

1. Knowledge Transfer and Impact
2. Research quality
3. Leverage
