Properly performing health care systems require concepts and methods that match their complexity. Resilience engineering provides that capability. It focuses on a system’s overall ability to sustain required operations under both expected and unexpected conditions rather than on individual features or qualities. This book contains contributions from international experts in health care, organisational studies and patient safety, as well as resilience engineering. Whereas current safety approaches primarily aim to reduce the number of things that go wrong, Resilient Health Care aims to increase the number of things that go right.

Contents: Preface: on the need for resilience in healthcare, Erik Hollnagel, Jeffrey Braithwaite and Robert L. Wears; Part I Health Care as a Multiple Stakeholder, Multiple Systems Enterprise: Making healthcare resilient: from safety-I to safety-II, Erik Hollnagel; Resilience, the second story, and progress on patient safety, Richard Cook; Resilience and safety in healthcare: marriage or divorce?, René Amalberti; What safety-II might learn from the socio-cultural critique of safety-I, Justin Waring; Looking at success versus looking at failure: is quality safety? Is safety quality?, Sam Sheps and Karen Cardiff; Healthcare as a complex adaptive system, Jeffrey Braithwaite, Robyn Clay-Williams, Peter Nugus and Jennifer Plumb.

Part II The Locus of Resilience - Individuals, Groups, Systems: Resilience in intensive care units: the HUG case, Jean Paries, Nicolas Lot, Fanny Rome and Didier Tassaux; Investigating expertise, flexibility and resilience in socio-technical environments: a case study in robotic surgery, Anne-Sophie Nyssen and Adélaïde Blavier; Reconciling regulation and resilience in healthcare, Carl Macrae; Re-structuring and the resilient organisation: implications for health care, Robyn Clay-Williams; Relying on resilience: too much of a good thing?, Robert L. Wears and Charles A. Vincent; Mindful organising and resilient healthcare, Kathleen M. Sutcliffe and Karl E. Weick.

Part III The Nature and Practice of Resilient Health Care: Separating resilience from success, Rollin J. Fairbanks, Shawna Perry, William Bond and Robert L. Wears; Adaptation versus standardisation in patient safety, Sheuwen Chuang; The use of PROMS to promote patient empowerment and improve resilience in health care systems, Alessandra Gorini, Ketti Mazzocco and Gabriela Pravettoni; Resilient health care, Rob Robson; Safety-II thinking in action: ‘just in time’ information to support everyday activities, Robyn Clay-Williams and Jeffrey Braithwaite; Mrs Jones can’t breathe: can a resilience framework help?, Patricia H. Strachan; Epilogue: how to make health care resilient, Eric Hollnagel, Jeffrey Braithwaite and Robert L. Wears; Bibliography; Index.
